

Tree - Juniperus scopulorum 'Wichita Blue'

Common Name: Wichita Blue

Description:

Compact, conical, brilliant blue Juniperus scopulorum, commonly known as 'Wichita Blue' is adaptable to hot dry climates. Medium growth pattern to 12 feet tall by 6 feet wide. Requires medium water, well drained soil and has proven it can be water-wise. Full sun, low maintenance. Best avoided along immediate coast.

- **Type:** Tree
- **Exposure:** Full Sun
- **Height:** 12 Feet
